DISC Personal Profile

Slide 9

DISC Profile

	Fast		
Task	D Dominance	I Influence	People
	C Conscientiousness	S Steadiness	
	Slow		

Slide 10

Escape Fire: The Fight to Rescue American Healthcare

Movie

- Indorsed by the AMA, AAFP, and ANA
- CNE credits

Activities

- Students viewed portions of the movie
- Separated into groups to design a "Safety-Net Clinic"
- Groups included different professions and different DISC profiles
- A "distracter" was placed in each group

Slide 12

Steps to Awareness Wheel

- **Facts:** We have been assembled to develop a safety net clinic. The goal of this assignment is for us to work effectively as an interprofessional team. So far we have not heard the opinions of the other members of the team.
- **I imagine:** I imagine that you have had a lot of experience in healthcare. I imagine that you are not confident that the others on the team have as much experience as you do. Thus the other members of the team do not have as much to offer.
- **I feel:** I am concerned that we may not be able to develop a safety net clinic that considers the expertise of all of the professions on the team. I feel somewhat unheard and that my contributions are not seen as important.
- **I want:** I would like for us to develop the best safety net clinic that we can. I want to be able to utilize your expertise as well as the expertise of the others on the team to develop the most effective safety net clinic. Can you help me figure out how we can make this happen?

Slide 13

Outcome

- **Project on Safety Net Clinic:**
 - Physical therapist tended to see physicians as leaders and themselves as managers
 - DNP saw themselves as the leader
 - The teams did develop clinics that included other professions
 - The assignment was well received
 - Students wanted more time to work as teams
 - Students wanted more disciplines in the course
